

Mohamed Rashad

Robotics Deployment Operations | Autonomous Systems Testing
+1 415 937 2493 | ososlanshon@gmail.com | Millbrae, CA | Open to Relocate

SUMMARY

Robotics and autonomous systems operations professional with experience at Figure, Tesla, and Zipline. Background in field deployment support, UAV test operations, hardware validation, troubleshooting, documentation, and coordinating operational readiness for technical teams.

EXPERIENCE

Deployment Operations Specialist | Figure — San Jose, CA

May 2026–Present

- Support humanoid robotics data collection by preparing residential sites, staging props, and coordinating setup, resets, and move-in/move-out activities across multiple locations.
- Manage procurement, inventory, sorting, and kitting; plan deliveries and pickups around vehicle capacity, storage availability, and deployment priorities.
- Communicate site requirements and blockers to team leads, adapting logistics to changing schedules and resource needs.

Testing Specialist, Autopilot | Tesla — Palo Alto, CA

Oct 2025–May 2026

- Executed 100+ hardware validation tests to uncover pre-deployment design flaws; documented 200+ test outcomes to support engineering feedback and corrective actions.
- Reduced downtime by 30% through root cause diagnosis and issue resolution during live data collection; deployed weekly firmware updates and stable fleet builds.
- Led regression modeling (A vs. B) efforts that improved predictive performance by 15%; coordinated between operations and engineering to improve data quality.

Flight Test Operations Analyst | Zipline — Half Moon Bay, CA

Sep 2024–Oct 2025

- Executed 150+ UAV test flights, including preflight, launch, and recovery, to validate safety, reliability, and performance of P2 prototypes.
- Diagnosed and resolved 95% of in-flight anomalies with engineering, reducing downtime by 30%; maintained flight hardware and ground systems to reduce operational failures by 25%.
- Provided technical feedback contributing to 10+ design optimizations supporting UAV efficiency, flight stability, and FAA Type Certification requirements.

SOX PMO & Testing Analyst Intern | SoFi — San Francisco, CA

Apr 2024–Aug 2024

- Performed business analysis and SOX control testing across applications, systems, and reports to assess accuracy and compliance.
- Collaborated with project managers and cross-functional teams to address financial risks and control execution; tracked projects and reporting in Asana and Audit Board.

Work Station Support Analyst Intern | Yaseen Foundation — San Francisco, CA

Aug 2023–Dec 2023

- Supported workstations, peripherals, and network troubleshooting; maintained knowledge documentation and performed backups and data recovery.
- Contributed to cybersecurity improvements reducing vulnerabilities by 40%; streamlined IT processes to improve response times by 20% and service quality by 15%.

Store Manager | Starbucks — San Francisco, CA

Jan 2020–Aug 2023

- Led and trained 10+ baristas and shift supervisors, improving customer service scores by 15% within six months.
- Reduced operating costs by 10% through inventory and waste management; drove 20% annual sales growth through marketing, upselling, and customer experience improvements.

EDUCATION

San Francisco State University — B.S., Business Information Systems / InfoSec Management

SKILLS

Operations: Field readiness, inventory, procurement, logistics, test documentation, cross-functional coordination
Tools: G Suite, SharePoint, OneDrive, Excel, Asana, Audit Board | Technical: HTML, CSS, Python, SQL, Linux
